

MEMORANDUM

To	All Employees — Solara Renewables & Manufacturing Pvt. Ltd.
From	Ananya Rao, Vice President, People & Culture
Date	1 September 2026
Subject	Update to the Hybrid Work & Mobile/Internet Reimbursement Policy, effective 1 October 2026
Ref.	SOL/HR/POLICY/2026-27/07

Dear All,

Following feedback gathered through the Q3 Employee Engagement Survey and consultation with department heads, we are updating two related policies effective 1 October 2026. Please read this memo carefully — it supersedes Sections 2.2 and 5.4 of the Employee Handbook (Version 4.2) until the next full handbook revision incorporates these changes.

1. What is Changing

- **Hybrid Work Eligibility:** Corporate-office employees at grade E4 and above, whose roles do not require daily physical presence (confirmed by their department head), may work from home up to 2 days per week, subject to manager approval and core-hours availability (10:00 AM-4:00 PM) for meetings.
- **Mobile & Internet Reimbursement:** The eligibility threshold is being lowered from grade M1 to grade E4 and above, and the monthly cap is being raised from ₹1,500 to ₹1,800, reflecting current market rates for broadband and mobile data plans.
- **Plant-based and field-based roles** (Manufacturing, QA, Supply Chain warehouse staff) are not eligible for hybrid work under this policy, given the nature of on-site work; this is unchanged from the existing policy.

2. Why We're Making This Change

41% of respondents to the Q3 engagement survey specifically flagged commute and flexibility as an area for improvement, and several department heads separately raised that the existing M1+ threshold for reimbursement excluded several E3/E4 employees who are now regularly using personal data plans for work calls and email outside office hours. This update responds directly to both points.

3. What You Need to Do

1. If you are grade E4 or above in a corporate-office role, discuss hybrid-work eligibility and your preferred WFH days with your Reporting Manager by 20 September 2026.
2. Approved hybrid arrangements must be logged in the HRIS Attendance module so plant/office access and headcount planning remain accurate.
3. If you are newly eligible for mobile/internet reimbursement (grade E4), submit your first claim through the existing Expense Module from 1 October 2026 onward; no separate registration is required.
4. **Managers:** please flag any role that you believe should be hybrid-eligible but sits below E4, or vice versa, to HR by 15 September 2026 for review — this is a policy floor, not a rigid rule, and we expect a small number of exceptions.

4. Questions

Please direct questions to your HR Business Partner or to hr@solararenewables.in. We will hold a short Q&A session at the next town hall (17 September 2026) to walk through common scenarios.

Thank you,

Ananya Rao
